Summary

Software engineer with about 3 years of experience building, testing, and supporting backend services and API integrations in C#/.NET, Java, and Python. Delivers cloud-native microservices on Azure and AWS with CI/CD pipelines, automated testing, observability, and secure development practices. Background in integrating disconnected enterprise systems and migrating business data at 99%+ integrity for Reliance Industries. Regular user of AI-assisted development tools, including GitHub Copilot.

Technical Skills

Backend: C#, .NET, Web APIs, Java, Spring Boot, Python, FastAPI, Node.js, TypeScript, REST APIs, Microservices

Cloud: Azure (App Services, Key Vault, Blob Storage), AWS (S3, Redis), Docker, Kubernetes

Data: PostgreSQL, Flyway, SQL, ETL

Practices: CI/CD pipelines, unit / integration / end-to-end testing, code reviews, observability, production support, secure development, SDLC, Git

AI-Assisted Development & GenAI: GitHub Copilot, Claude, LLM APIs, RAG, LangChain, multi-agent pipelines, MLflow

Professional Experience

SSPACIA India Pvt. Ltd.

Jul 2025 – Present

AI & Automation Engineer

Ahmedabad, India

- Integrated 5+ previously disconnected tools into one cloud-native internal ERP by building scalable backend microservices and REST APIs, raising workflow efficiency by 40%.
- Cut manual reporting effort by 50% by automating ETL and data pipelines in Python and SQL on PostgreSQL, with Flyway-versioned schema migrations.
- Established CI/CD pipelines with monitoring and observability for production services across 2 clouds (Azure and AWS), speeding up releases and the diagnosis of production issues.
- Raised release quality by implementing unit, integration, and end-to-end tests and reviewing teammates' code against secure coding standards across the software development lifecycle.
- Secured application secrets and files with Azure Key Vault, Blob Storage, and AWS S3, and reduced API response times with Redis caching.
- Shipped production GenAI features (RAG and multi-agent pipelines across 3 LLM providers: Claude, GPT-4, and Gemini) behind REST APIs, automating document classification and reporting for business teams.

Mindra Group (Reliance Industries Ltd.)

Dec 2023 – Jul 2025

SAP Consultant

Ahmedabad, India

- Migrated 50,000+ business records into a new SAP B1 platform at 99%+ data integrity by writing SQL validation scripts and automating reconciliation.
- Reduced report-generation time by 35% by automating Crystal Reports workflows and standardizing recurring business reporting.
- Resolved production data and reporting issues for finance and operations users, keeping recurring business reports accurate and on schedule.

Projects

Operatik: Modular Business-Operations Platform | REST APIs, Microservices, PostgreSQL, Docker

- Designed a microservices platform exposing REST APIs across 4 business modules (HR, order-to-delivery, purchasing, accounts), keeping data consistent through cross-module synchronization.

Nebulux: Multi-Agent Software Engineering System | Node.js, WebSockets, Claude, Gemini

- Built an asynchronous, distributed Node.js backend coordinating 5 specialized agents across 4 LLM backends, with WebSocket streaming to live dashboards and secure bring-your-own-key credential handling.

LLM Bias & Fairness Evaluation Harness | Python, PyTorch, Hugging Face

- Open-sourced a reproducible, automated evaluation harness covering 3 standard benchmarks (StereoSet, CrowS-Pairs, BBQ), with batched inference and per-category scoring across multiple open-source LLMs.

Aria: Multilingual iOS AI Assistant | SwiftUI, Anthropic API

- Built a privacy-first iOS assistant supporting 3 languages (Hindi, Gujarati, English) with on-device storage, integrating the Anthropic API, speech services, and EventKit/Contacts.

Education

Parul Institute of Engineering & Technology

2020 – 2024

B.Tech in Computer Engineering, AI & Machine Learning (CGPA: 8.1/10)

Vadodara, India
